

ADDENDUM

FINDING OF NO SIGNIFICANT IMPACT

**SHORE FIRE CONTROL PARTY FEASIBILITY STUDY
MARINE CORPS BASE, CAMP LEJUENE
Onslow Bay County, North Carolina**

The purpose of this action is to evaluate a site for training Marine Corps Naval gunfire spotting teams. This action, consisting of 12 non-explosive rounds and, potentially, 12 explosive rounds is not intended to and cannot replace the Naval surface fire support training and certification conducted elsewhere. That training and certification requires approximately 80-120 rounds fired in approximately 11 different training missions including, in part, direct observation of some of the targets for shipboard fire control, which is not being conducted in this action.
